**Dolphin RFID at RFID Journal Live! 2016 – Orange County Convention Centre, Orlando , Florida,**

**Dolphin RFID - India's leading end-to-end RFID solution provider launches their next generation locks - Asteria, Sleek, Vidala. These locks offer a host of features such as Elevator Control , Energy Management, Display system and interface of the lock control software with all major PMS.**

**Orlando / Mumbai 3<sup>rd</sup> May 2016:** The Hospitality sector is extremely competitive and organizations operating in this sector have to heavily rely on technology to enhance market share and customers. Dolphin RFID understands the needs of this sector and offers comprehensive RFID solutions. The company is one of the very few RFID players offering end-to-end RFID solutions enabling Energy Management and Asset Management in hotels which help optimize costs. It has launched next generation locks - Asteria, Sleek & Vidala which are being showcased during the RFIDLive conference at booth # 1037.

The company's RFID based locks are used prominently across hotels in India. The UHF RFID has facilitated "Barrier Less" access control without compromising on security and safety for the guests and staff. These locks are ANSI/CE/FCC approved and are bundled features such as RFID Card based Energy Switch, Waterproof, RFID-MiFare, Display System, Electronic Safes and interface of the lock control software with all major PMS is possible.

Speaking on the occasion, Commodore Sawhney, the President & CEO of Dolphin RFID, said - "Dolphin RFID has emerged as a leader to provide RFID solutions for Safety, Security and Asset management in the Hospitality industry. RFID enabled locks are the next generation solutions for Safety and Security and we are witnessing a huge demand from the industry."

He added that "Dolphin's strategy is aimed at preparing for the impending IOT revolution by expanding its implemented end-to-end RFID solutions. We are already present in 6 continents and looking at enhancing our association with a network of capable channel partners to exponentially expand our presence in new markets."
